

# Tyson Library eNewsletter

Welcome to our digital newsletter! Below you'll find library news, reading recommendations, program information and more.

## Cooking Program Enjoys Successful Start

*Adult patrons work together to prepare spare ribs for the group's meal during January's Cook Club program at Tyson Library.*

[CLICK HERE FOR MORE ADULT PROGRAMS](#)

Tyson Library will host a monthly cooking program for adults through April this year. Each time the program is held, the attendees will work together to prepare a meal with recipes and ingredients provided by the library. In January, the group made spare ribs with sides. For February, a meal featuring chicken fajitas will be prepared and enjoyed. A new registration is required for each month's program. Adult patrons can save their seats on the library's website.

## Kids Book Club Reads and More!

Tyson Library's Kids Book Club enjoyed several stories during their January meetings. The students in grades kindergarten through 3rd grade, listen as Miss Aly read the selected stories then participate in

conversations and activities. Each of the books the group reads are chosen from a list supplied by the Mensa for Kids' Excellence in Reading program.

## TYSON LIBRARY TRIVIA

February's Question:

**Which Ripley County offices were housed in Tyson Library when it was first built?**

To enter to win our quarterly Adult Prize Drawing, email your answer to this month's question to [info@tysonlibrary.org](mailto:info@tysonlibrary.org). Be sure to include "Tyson Library Trivia" in the subject line. Check next month's newsletter to see if you answered correctly!

January Answer: 1942

## LIBRARY HOURS

**Monday-Friday**

10am-6pm

**Saturday**

10am-3pm

**Closed Sunday**

## BOOK REVIEW

### It's Elemental: The Hidden Chemistry in Everything by Kate Biberdorf

Reviewer: Tali Crowe, Tyson Library Staff

The only chemistry experience I thought I could tell anyone about was the class I took in high school (which, honestly, was not one of my favorites). It turns out, I experience chemistry all day, every day. We all do. This book explained some rather complicated chemistry and chemical processes that take place in our daily lives, but the author presented them in a way that is not only easy to understand, but is actually interesting. I recommend this book to anyone interested in thinking a little differently about things like sunscreen, coolers, shampoo, coffee, hot tubs, and more. And, if you're in a chemistry class and you don't understand why this topic is important, I encourage you to read this book. I think it would've motivated me to try a little harder to understand why we needed to balance those chemical equations!

## UPCOMING PROGRAMS

### COOKING CLUB

*Friday, March 22  
11 a.m.  
Adult program

## ONLINE RESOURCE

The Indiana Learning Lab supports educators and families. The site includes live, on-demand workshops for educators. As part of this resource, educators have access to expanded online communities focused on supporting literacy instruction, digital instruction and science, technology, engineering, and math (STEM) instruction. The platform also includes ready-to-use resources and lesson ideas.
